illustrated parts breakdown manual

CERTIFICATION

The Hewlett-Packard Company certifies that this instrument was thoroughly tested and inspected and found to meet its published specifications when it was shipped from the factory. The Hewlett-Packard Company further certifies that its calibration measurements are traceable to the U.S. National Bureau of Standards to the extent allowed by the Bureau's calibration facility.

ILLUSTRATED PARTS BREAKDOWN

MODEL 2100A COMPUTER

SERIAL NUMBERS COVERED

This manual applies directly to Model 2100A Computers having serial numbers prefixed 1136, 1140, 1145, 1146, 1147, 1148, 1150, 1202, 1203, 1215, 1224, 1230, 1238, 1243, 1244, 1249, 1250, 1304, 1306, 1312, 1314, 1320, 1322, and 1330. Computers with higher prefix numbers will be covered in manual updating supplements.

OPTIONS COVERED

This manual covers options 001, 004, 008, 012, 015, 016, 024, and 032 as well as the basic computer.

ACCESSORIES COVERED

This manual covers the following accessory kits:

12884A, 12884A-001 and 12884A-002 Memory
(4K Increments) Accessory Kits

12885A, 12885A-001, 12885A-002, 12885A-003,
and 12885A-004 Memory (8K Increments)
Accessory Kits

12895A Direct Memory Access Accessory Kit

12899A Operator Panel Accessory Kit

12901A Floating-Point Hardware Accessory Kit

1-1. INTRODUCTION.

1-2. This Illustrated Parts Breakdown (IPB) Manual, part no. 02100-90004, is one in a set of five manuals that document the Hewlett-Packard 2100A Computer (figure 1-1). The other manuals in the series are: the power supply Operating and Service Manual, part no. 5951-3038, the Reference Manual, part no. 02100-90001, the Installation and Maintenance Manual, part no. 02100-90002, and the Diagrams Manual, part no. 02100-90003. The computer is documented in the five manuals as follows:

- a. This IPB manual contains replaceable parts ordering information, replaceable parts lists, exploded views, part location diagrams, and numerical lists of parts for all assemblies of the computer except the power supply.
- b. The power supply manual contains all the information necessary to troubleshoot and repair the power supply. This includes installation instructions, schematic diagrams, and replaceable parts information.
- c. The Reference Manual contains specifications, operating instructions, and programming information for the computer.
- d. The Installation and Maintenance Manual contains instructions for installation, maintenance, troubleshooting, and repair of the computer, except as covered in the power supply manual.
- e. The Diagrams Manual provides interconnecting information and schematic diagrams for all assemblies of the computer except the power supply.

2133-7

Figure 1-1. HP 2100A Computer

1-3. Unless otherwise stated in future updating supplements, information contained in this manual is applicable to 2100A Computers having serial numbers with the prefixes listed on the title page of this manual.

1-4. SCOPE.

1-5. This manual is intended for use by maintenance personnel who are familiar with the maintenance procedures of the 2100A. A thorough understanding of the information presented in the Installation and Maintenance Manual for the computer is essential to using the material presented in this manual.

1-6. Sections II and III of this manual contain the following information:

- a. Section II, Replaceable Parts. Section II describes the replaceable major assemblies, assemblies, and detailed parts for the 2100A Computer, including all options and accessories. Power Supply, I/O interface card, and I/O device replaceable parts are listed in their respective operating and service manuals. Exploded or parts location views are located adjacent to the corresponding replaceable parts lists. Where disassembly is significant, replaceable parts are listed and indexed in the order of disassembly.
- b. Section III, Numerical Lists. Section III lists all replaceable parts for all the assemblies in the computer except the power supply. The parts are segregated into electrical and mechanical usage categories and are listed accordingly. Each of the two tables lists the replaceable part numbers in numerical sequence.
- c. Updating Supplements. If required, updating supplements are included with this manual. These supplements make the manual applicable to computers with serial numbers prefixed higher than those listed on the title page of this manual.

1-7. OPTIONS.

1-8. This manual covers options to the basic 2100A Computer as follows:

- a. Option 001. The controller panel replaces the standard operator panel.
- b. Option 004. Adds 4K of memory to the basic computer.
- c. Option 008. Adds 8K of memory to the basic computer.
- d. Option 012. Adds 12K of memory to the basic computer.
- e. Option 015. Provides for operation on 230-volt 50 hertz input power.
- f. Option 016. Adds 16K of memory to the basic computer.
- g. Option 024. Adds 24K of memory to the basic computer.
- h. Option 032. Adds 32K of memory to the basic computer.

1-9. MAJOR ASSEMBLY CONFIGURATIONS.

1-10. Table 1-1 lists the revision codes of the major assemblies used in the computer. The revision codes reflect the configuration as originally manufactured and shipped from the factory. Because of field modifications, repairs, board exchange, and other factors that may alter the shipped configurations, the configurations existing in the field may not always agree with the information presented in table 1-1.

NOTE: A separate Operating and Service Manual, part number 5951-3038, is supplied for the A25 Power Supply Assembly.

2-1. INTRODUCTION.

2-2. This section contains information that enables the user to interpret the replaceable parts lists in this section, and information to order replaceable parts for the computer. To order parts for the power supply, refer to its Operating and Service Manual, part no. 5951-3038.

2-3. REPLACEABLE PARTS LISTS.

2-4. Replaceable parts lists in this section are in two formats; lists by order of index number and lists by order of reference designation.

2-5. INDEX NUMBERED LISTS.

2-6. The index numbered lists (tables 2-1, 2-19, 2-20, and 2-33 through 2-36) are used in conjunction with the exploded views of the assemblies and subassemblies of the computer. The replaceable parts are referenced to the exploded views by index numbers which are in the order of disassembly except for attaching parts which are indexed immediately after the parts they attach.

2-7. Items in the DESCRIPTION column of the replaceable parts lists are indented to indicate item relationship. In addition, the symbol “— — — x — — —” follows the last of one or more attaching parts. Indentation is as follows:

MAJOR ASSEMBLY

- * Subassembly
- * Attaching Parts for Subassembly
- ** Subassembly Parts
- ** Attaching Parts for Subassembly Parts

2-8. The columns in the index numbered lists provide the following information for each part:

- a. FIG. & INDEX NO. The figure and index number where the replaceable parts are shown in an exploded view.
- b. HP PART NO. The HP part number for each replaceable part.
- c. DESCRIPTION. The description of each replaceable part and its applicable reference designation. Also lists special applications (accessories and options) of the replaceable part. Refer to table 3-3 for an explanation of abbreviations used in the DESCRIPTION column.
- d. MFR CODE. A five digit code that denotes a typical manufacturer of the part. Refer to table 3-4 for a list of manufacturers.

e. MFR PART NO. The manufacturer's part number for each replaceable part.

f. UNITS PER ASSY. The total quantity of each part used in the assembly or subassembly to which it belongs.

2-9. REFERENCE DESIGNATION ORDER LISTS.

2-10. The lists which are in reference designation order (tables 2-2 through 2-18, 2-21, and 2-22) are used in conjunction with the parts location diagrams for the printed-circuit cards. The replaceable parts are referenced to the parts location diagrams by reference designations which correspond to the printed-circuit card schematic diagrams provided in the 2100A Diagrams Manual, part number 02100-90003.

2-11. The columns in the reference designation order lists provide the following information for each part:

- a. REFERENCE DESIGNATION. The assembly designation and complete reference designation for each replaceable part.
- b. HP PART NUMBER. The HP part number for each replaceable part.
- c. QTY. The total quantity of a part used on the printed-circuit card is listed with the first entry for that part number.
- d. DESCRIPTION. The description of each replaceable part. Refer to table 3-3 for an explanation of abbreviations used in the DESCRIPTION column.
- e. MFR CODE. A five digit code that denotes a typical manufacturer of a part. Refer to table 3-4 for a list of manufacturers.
- f. MFR PART NUMBER. The manufacturer's part number for each replaceable part.

2-12. EXPLODED VIEWS.

2-13. The exploded views, which are indexed in disassembly sequence except for attaching parts, correspond to replaceable parts lists in this section. The exploded views begin with figure 2-1 and show major assemblies and parts exploded away from the computer card cage assembly. This gives a representation of all the major assemblies and parts required to assemble the computer. Subsequent exploded views (figures 2-19, 2-20, and 2-23 through 2-26) are used to show the breakdown of the major

assemblies and are accompanied by corresponding replaceable parts lists.

2-14. PARTS LOCATION DIAGRAMS.

2-15. The parts location diagrams (figures 2-2 through 2-18, 2-21, and 2-22) are used to show the locations of components on the printed-circuit cards. The diagrams correspond to a reference designation order of replaceable parts lists located adjacent to the parts location diagrams. Reference designations provide correlation between the parts location diagrams and replaceable parts lists. The parts location diagrams are identical to the ones shown in the Diagrams Manual, part number 02100-90003. In that manual, the schematic diagram, parts location diagram, and replaceable parts list for each printed-circuit card are grouped together.

2-16. ORDERING INFORMATION.

2-17. To order replaceable parts for the computer, or an option or accessory, address the order to the local Hewlett-Packard Sales and Service Office listed at the end of this manual. (For power supply, I/O interface card, or I/O device ordering information, refer to their respective operating and service manuals.) The following information should be included in the order for each replaceable part.

- a. Complete computer model number (including options and accessories) and serial number.
- b. Hewlett-Packard part number for each part.
- c. Complete description for each part as provided in the replaceable parts lists.
- d. Circuit reference designation, if applicable, as shown in the replaceable parts lists.

NOTES: 3. Part no. 1820-0695 used on some cards; the two parts are interchangeable.

4. Used only on cards having floating-point capability.

5. One 0340-0788 insulator is used with each 1200-0767 socket.

- NOTES: 1. THIS DIAGRAM ALSO APPLIES TO CARD REV. A-1106-22 AND B-1132-22.
2. U25, U26, U27, U35, U37, AND U65 USED ONLY FOR OPTIONS SUCH AS FLOATING-POINT CAPABILITY.
3. R73 FIRST USED ON CARD REV. C-1144-22.

3-1. INTRODUCTION.

3-2. This section contains a complete listing of every replaceable part for the computer. The parts are segregated by the electrical or mechanical usage into two tables; tables 3-1 and 3-2, respectively. The listing of the parts in each table is in numerical order by part number, except in table 3-1 cable, connector, and card assemblies are listed at the end of the individual part listings.

3-3. Tables 3-1 and 3-2 are divided into segments to provide parts usage for the basic computer and for the

various memory sizes, accessories, and options. The first segment of each table provides parts usage for the basic computer. For variations from the basic computer, add to, delete from, or change TQ column of the first segment as instructed in the DESCRIPTION column for the applicable segment.

3-4. The DESCRIPTION column and MFR CODE column of the tables use abbreviations and five digit codes, respectively. The abbreviations used in the DESCRIPTION column are explained in table 3-3, and the five digit codes used in the MFR CODE column are explained in table 3-4.
